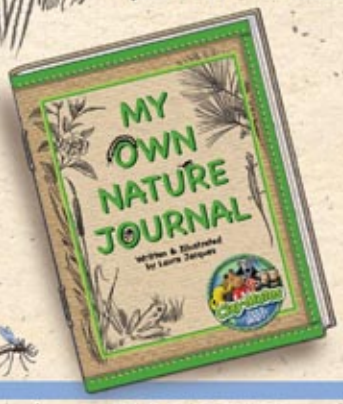
Nature Doodles

NATURE JOURNALING FOR KIDS

...of all ages!

Nature Journaling brings insight and appreciation of the natural world to anyone willing to give it a try!

Drawing on our five senses, we will explore fascinating plants and amazing creatures --that live right under our noses! It's not about being an "artist" or drawing "perfectly". It's about learning basic observation skills that will enhance awareness and encourage respect for the natural treasures we bypass everyday. Students will take an unintimidating look at the "art in nature" with Childrens' Book Illustrator Laura Jacques. By writing short notes and sketching details about objects and animals that they themselves choose and find interesting, each person will create a unique and personal record of their experience!



Each attendee will receive their own copy of ***"My Own Nature Journal"*** *and encouragement to continue journaling* ***after*** *class is over!*
